

Product Name: Aquatronics™ Canon Simple

Overview:

Aguair's stainless steel Aquatronics™ Canon nozzle is unique in the industry. It is the perfect solution for maintaining high humidity levels without wetness in medium to large storage rooms. The Canon is 100% efficient as all water evaporates into the room.

Features:

- All in nozzle body with controls built right in the nozzle body
- Large orifice prevents clogging or mineral build-up
- Fully adjustable to your preferred humidity levels
- Up to 98% humidity without wetness
- High flow rate of 0.5-1.0 gal/hr
- Comes with dry contact connection to easily connect to an existing master control
- Very fine fog evaporates immediately without wetness
- Low air/water pressure of 20-40psi (system comes with a small compressor)
- Plug And Play option available with a small-size compressor, nozzle, and controls
- 24 volt solenoid valve with automatic pressure regulator at the nozzle for complete elimination of dripping before and after fogging
- Components are modular to meet customers' needs
- No holding tank required for water or air

Nozzle Specs	
Flow Rate	0.5-1.0 GPH per nozzle
Drop Size	6-10 microns
Water Pressure	30 PSI
Air Pressure	20-30 PSI
Nozzle Material	Stainless Steel
Nozzle Connection	3/8 in Quick Connect
Electric	110V or 220V 50/60 HZ (2 plug outlet 20 AMPS)
Water Inlet	1/2 inch NPT (1/2 inch FNPT ball valve required)

Compressor
