

Product Name: SaniCart™ 2.5 Compact Portable Fogging Sanitization System

Overview:

SaniCart™ Compact 2.5 is a mobile, fogging sanitization system, used to protect against surface and airborne viral, bacterial, and mold contamination. The SaniCart™ 2.5 technological breakthrough involves a patented micro-fog nozzle, which humidifies the entire room with any disinfectant including peracetic acid, hydrogen peroxide, chlorine dioxide, citric acid, or any other EPA-approved viral biocide.

Features:

- Adjustable auto Start/Stop timer
- Compact design for mobile versatility
- Impact resistant, military grade plastic frame
- All-terrain hard rubber wheels
- Fully adjustable and detachable fog nozzle
- Easy carry-on handle
- Spray flow rate of 0.5 GPH
- Dimensions: 22" x 14" x 26"

Water flow/mist	0.5 GPH
Power	120 Volt AC 4.5 AMPS
Capacity	2.5 US gallons
Tank material	HDPE
Fill cap size	2.25"
Dimensions (L x W x H)	26.2" x 23" x 13.7"
Dry weight	57 pounds
